

COMPOSITES GUREA

WARNING!

INSTRUCTIONS FOR STORAGE AND TRANSPORT

- Foreign bodies between panels and sharp edges may damage the product. Prevent the panels from sliding on top of each other.
 - ✓ Always lift up the panels, never drag them: use systems with suckers
 - ✓ Always secure the panels during transport
- To prevent the panels from being irredeemably twisted out of shape:
 - ✓ Never store or transport them upright or tilted to one side; always do this horizontally
 - ✓ Never leave them out in the sun before installing them, and do not store them outdoors without protective cardboard or canvas
- ✓ **Follow these instructions to ensure that the surface is kept in perfect condition and to avoid any undesirable twisting**
- ✓ **COMPOSITES GUREA accepts no responsibility for any damage that the material may suffer during handling by the customer**

INSTRUCTIONS FOR FASTENING WITH ADHESIVE

- To SAND DOWN the panel use a rough-grained sander and make sure that the wood is exposed in the area to be glued.
- Follow the instructions in our assembly systems catalogue in detail. You can find this on our web page: www.parklex.com

Don't forget that PARKLEX is NATURAL WOOD. Treat it carefully
